

Project Planning

Project Name	ComicCraft - AI Comic Story Creator using Gemini Models
Team ID	SWTID-2026-1254
Team Lead	Kamalesh S
Team Members	Tamilselvan P, Tamilselvam K, Mugunthan S, Suriya L

Milestone 1 - Model Selection and Architecture

Research and select generative AI models, define application architecture, and set up the development environment.

Milestone 2 - Core Functionalities Development

Develop outline generation, story generation, image generation, layout building, PDF export, and FastAPI backend processing.

Milestone 3 - routes.py Development

Create the main application routes and integrate all AI workflows with form and JSON inputs.

Milestone 4 - Frontend Development

Design the user interface and create dynamic Jinja2 templates for input, comic preview, and export success.

Milestone 5 - Deployment

Prepare the application for local deployment and verify the complete workflow using the FastAPI server.

Execution Order

Model/architecture → core AI functions → backend routes → frontend templates → local deployment and testing.
